

Alarm System Installer-Kalamazoo Branch

Duties include the installation of electrical/electronic protective signaling systems used to notify our Central Station of fire, burglary, or other irregularities on the customer's premises. Also includes installation of wiring conduit and signaling equipment following blueprints of electrical layouts and building plans.

Requirements:

- Experience with installation of wiring conduit and signaling equipment including fire, CCTV, Access Control, video surveillance, IP Cameras and basic security system equipment
- A working knowledge of equipment application, mounting techniques, programming and testing
- Knowledge of architecture for video surveillance, streaming data and core network technologies such as routing and switches.
- Two year electronic degree or electronic training in the military.
- Clean driving record and no felony convictions.
